wristband tester		4822 344 13999

INFORMATION ABOUT LEAD-FREE SOLDERING

Philips CE is producing lead-free sets from 1.1.2005 onwards.

IDENTIFICATION:

Regardless of special logo (not always indicated) one must treat all sets from 1 Jan 2005 onwards, according next rules:

Example S/N:

Bottom line of typeplate gives a 14-digit S/N. Digit 5&6 is the year, digit 7&8 is the week number, so in this case 2005 wk12

So from 0501 onwards = from 1 Jan 2005 onwards

Important note: In fact also products of year 2004 must be treated in this way as long as you avoid mixing solder-alloys (lead/ lead-free). So best to always use SAC305 and the higher temperatures belong to this.

Due to lead-free technology some rules have to be respected by the workshop during a repair:

- Use only lead-free solder alloy Philips SAC305 with order code 0622 149 00106. If lead-free solder-paste is required, please contact the manufacturer of your solder-equipment. In general use of solder-paste within workshops should be avoided because paste is not easy to store and to handle.
- Use only adequate solder tools applicable for lead-free solder alloy. The solder tool must be able
 - To reach at least a solder-temperature of 400°C,
 - To stabilize the adjusted temperature at the solder-tip
 - To exchange solder-tips for different applications.
- Adjust your solder tool so that a temperature around 360°C – 380°C is reached and stabilized at the solder joint. Heating-time of the solder-joint should not exceed ~ 4 sec. Avoid temperatures above 400°C otherwise wear-out of tips will rise drastically and flux-fluid will be destroyed. To avoid wear-out of tips switch off un-used equipment, or reduce heat.
- Mix of lead-free solder alloy / parts with leaded solder alloy / parts is possible but PHILIPS recommends strongly to avoid mixed solder alloy types (leaded and lead-free).
If one cannot avoid or does not know whether product is lead-free, clean carefully the solder-joint from old solder alloy and re-solder with new solder alloy (SAC305).
- Use only original spare-parts listed in the Service-Manuals. Not listed standard-material (commodities) has to be purchased at external companies.
- **Special information for BGA-ICs:**
 - always use the 12nc-recognizable soldering temperature profile of the specific BGA (for de-soldering always use the lead-free temperature profile, in case of doubt)
 - lead free BGA-ICs will be delivered in so-called 'dry-packaging' (sealed pack including a silica gel pack) to protect the IC against moisture. After opening, dependent of MSL-level seen on indicator-label in the bag, the BGA-IC possibly still has to be baked dry. (MSL=Moisture Sensitivity Level). This will be communicated via AYS-website.
 - Do not re-use BGAs at all.
- For sets produced before 1.1.2005 (except products of 2004), containing leaded solder-alloy and components, all needed spare-parts will be available till the end of the service-period. For repair of such sets nothing changes.
- On our website www.atyourservice.ce.Philips.com you find more information to:
 - BGA-de-/soldering (+ baking instructions)
 - Heating-profiles of BGAs and other ICs used in Philips-sets

You will find this and more technical information within the "magazine", chapter "workshop news".

For additional questions please contact your local repair-helpdesk.

SERVICE INSTRUCTION

Safety regulations require that after a repair, the set must be returned in its original condition. Pay in particular attention to the following points:

- Route the wire trees correctly and fix them with the mounted cable clamps.
- Check the insulation of the AC Power lead for external damage.
- Check the strain relief of the AC Power cord for proper function.
- Check the electrical DC resistance between the AC Power Plug and the secondary side (only for sets which have a AC Power isolated power supply):
 1. Unplug the AC Power cord and connect a wire between the two pins of the AC Power plug.
 2. Set the AC Power switch to the "on" position (keep the AC Power cord unplugged!).
 3. Measure the resistance value between the pins of the AC Power plug and the metal shielding of the tuner or the aerial connection on the set. The reading should be larger than 4.5 Mohm (For U.S. it should be between 4.2 Mohm and 12 Mohm).
 4. Switch "off" the set, and remove the wire between the two pins of the AC Power plug.
- Check the cabinet for defects, to avoid touching of any inner parts by the customer.

SPECIFICATION

GENERAL:

Mains voltage /05/12 : 220-240V
 /55/77/78 : 110-127/220-240V Switchable
 Mains frequency
 /05/12 : 50 Hz
 /55/77/78 : 50/60 Hz
 Power consumption : < 50W max.
 < 5W at standby
 Clock accuracy : 2 seconds per day
 Dimension center unit : 220 x 292 x 285 mm
 Dimension speaker : 190 x 292 x 182 mm
 Weight (with/without speaker box)
 : 4.9 /2.3 Kgs

TUNER:**FM**

Tuning range : 87.5 – 108 MHz
 IF Frequency : 10.7 MHz \pm 20kHz
 Aerial input : 75 Ω pigtail wire
 Sensitivity at 26sb S/N : < 18 μ V
 Selectivity at 600 kHz
 Bandwidth : > 25 dB
 IF rejection : > 75 dB
 Image rejection : > 25 dB
 Distortion : < 3%
 Crosstalk : > 18 dB

MW

Tuning range
 9 kHz grid : 531 – 1602 kHz
 10 kHz grid : 530 – 1700 kHz
 IF Frequency : 455 kHz \pm 1kHz
 Aerial input : Loop antenna
 Sensitivity at 26sb S/N : < 4.0 mV/M
 Selectivity at 18 kHz
 Bandwidth : > 18 dB
 IF rejection : > 45 dB
 Image rejection : > 28 dB
 Distortion : < 5%

AMPLIFIER:

Output power : 2 x 20 W RMS
 Speaker impedance : 8 ohm
 Frequency response
 Within \pm 3dB : 63Hz – 16 kHz
 Hyper bass sound ON : 8dB \pm 3dB at 125Hz
 Digital sound control : Rock/Pop/Jazz/Classic
 Headphone output : 32 mW \pm 2dB at 32 Ω

CASSETTE RECORDER:

Number of tracks : 2 x 2 stereo
 Tape speed : 4.76 cm/sec +2.5/-1.5%
 Wow and flutter : < 0.4% DIN
 Fast-wind/rewind time : < 130 sec. With C-60
 Bias frequency : 75 \pm 10 kHz
 R/P frequency response : 125 – 8 kHz (8 dB)
 Signal to noise ratio : > 35 dB with type 1 tape

COMPACT DISC:

Number of programming track : 32
 Frequency response
 Within \pm 1.5 dB : 20 Hz – 20 kHz
 Signal/Noise ratio : 50 dB/A-weighted
 Distortion at 1 kHz : < 3%
 Channel separation at 1 kHz : > 25 dB
 Support disc format :
 Disc format ISO9660, single session CD
 Max albums: 99, max. titles: 511
 Supported sampling frequencies: 32 kHz, 44.1 kHz, 48 kHz
 Bit rate : 32 – 256 (128 bits recommended)

SERVICE MEASUREMENT

Tuner FW

Use a bandpass filter to eliminate hum (50Hz, 100Hz) and disturbance from the pilotone (19kHz, 38kHz).

Tuner AM (MW,LW)

To avoid atmospheric interference all AM-measurements have to be carried out in a Faraday«s cage. Use a bandpass filter (or at least a high pass filter with 250kHz) to eliminate hum (50Hz, 100Hz).

CD

Use Audio Signal Disc SBC429 4822 397 30184
(replaces test disc 3)

RECORDER

Use Universal Test Cassette Fe SBC420 4822 397 30071

CONNECTION AND CONTROLS

Controls (illustrations on page 3)

- Controls on the system and remote control**
- ① **LCD Display**
 - shows the status of the system.
 - ② **IR SENSOR**
 - infrared sensor for remote control.
 - ③ **PROGRAM (PROG)**
 - for CD programs tracks and reviews the program.
 - ④ **STANDBY-ON (POWER ⏻)**
 - switches the system to standby/on.
 - ⑤ **⏸**
 - for CD/MP3 starts or pauses CD playback.
 - ⑥ **TITLE-/+ ⏮ ⏭ / ⏮ ⏭**
 - for CD/MP3 skips to the beginning of a current track/previous/ next track (title).
 - (press and hold) fast searches back and forward within a track/disc.
 - for clock/timer adjusts the hours and minutes for clock / timer functions.
 - ⑦ **Source selector (CD/TAPE/TUNER)**
 - selects the respective sound source for CD/TAPE/ TUNER.
 - ⑧ **CLOCK/TIMER**
 - sets the clock or timer function.
 - ⑨ **Band selector (MW/FMST/FM)**
 - for Tuner selects waveband: MW, FM (stereo) or FM1 (mono).
 - ⑩ **OPEN/CLOSE**
 - open/close the CD door.
 - ⑪ **STOP ■**
 - for CD/MP3 stops CD playback or erases a CD program.
 - ⑫ **TUNING**
 - tunes to a radio station.
 - ⑬ **DISPLAY**
 - display the current time.
 - ⑭ **DBB (Dynamic Bass Boost)**
 - enhances the bass.
 - ⑮ **VOLUME ▲/▼**
 - adjusts the volume level.
 - ⑯ **🎧**
 - connect headphones.
 - ⑰ **Tape Deck Operation**
 - RECORD ●** starts recording.
 - PLAY ▶** starts playback.
 - REW ◀◀/F.FWD ▶▶** fast rewinds/ forwards the tape.
 - STOP-OPEN ■** stops the tape; opens the tape compartment.
 - PAUSE II** pauses recording or playback.
 - ⑱ **REPEAT**
 - for CD/MP3 repeats a track/CD programme/ entire CD.
 - ⑲ **SHUFFLE**
 - for CD/MP3 plays CD tracks in random order.
 - ⑳ **SLEEP**
 - activates/deactivates or selects the sleeper time.
 - ㉑ **MUTE**
 - switches playback sound off and on.
 - ㉒ **TIMER ON/OFF**
 - activates/deactivates the timer.
 - ㉓ **DSC (Digital Sound Control)**
 - selects sound characteristics: CLASSIC/AZZI/POP/ROCK.
 - ㉔ **⏮ ⏭**
 - for CD/MP3 skips to the beginning of a current track/previous/next track (title).
 - for CD/MP3 (press and hold) fast searches back and forward within a track/ CD.
 - for clock/timer adjusts the hours and minutes for clock/timer functions.
 - ㉕ **ALBUM-/+ ⏮ ⏭ / ⏮ ⏭**
 - for MP3 selects an album.
 - ㉖ **ALBUM+**
 - for MP3 selects an album upward.

Preparations

Rear connections

The **power plate** is located at the back of the system.

(A) Power

- Before connecting the AC power cord to the wall outlet, ensure that all other connections have been made.
- If your system is equipped with a Voltage Selector; set the VOLTAGE SELECTOR to the local power line voltage.

WARNING!

- For optimal performance use only the original power cable.
- Never make or change any connections with the power switched on.

(B) Speakers Connection

Front Speakers

Connect the speaker wires to the SPEAKERS terminals, right speaker to "+" and left speaker to "L", coloured (marked) wire to "+" and black (unmarked) wire to "-".

- Fully insert the stripped portion of the speaker wire into the terminal as shown.

Notes:

- For optimal sound performance, use the supplied speakers.
- Do not connect more than one speaker to any one pair of + / - speaker terminals.
- Do not connect speakers with an impedance lower than the speakers supplied. Please refer to the SPECIFICATIONS section of this manual.

Preparations

Inserting batteries into the remote control

Insert two batteries type R03 or AAA into the remote control with the correct polarity as indicated by the "+" and "-" symbols inside the battery compartment.

CAUTION!

- Remove batteries if they are exhausted or will not be used for a long time.
- Do not use old and new or different types of batteries in combination.
- Batteries contain chemical substances so they should be disposed of properly.

DISASSEMBLY DIADRAMS

- A. Switch on the set.
Press OPEN/CLOSE to open the CD Tray.
Remove CD Door.

- B. Remove Top Cabinet
B1: Remove screws SP 3x12 - 6 pcs.
B2: Remove screws SP 3x12 - 4 pcs.
B3: Remove screws SP 3x12 - 4 pcs.

DISASSEMBLY DIADRAMS

C. Remove CD Loader

C1: Remove screws SP 3x12 - 2 pcs.

C2: Remove screws SP 3x15 - 2 pcs.

C3: Remove screws SP 3x10 - 1 pcs.

D. Remove Bottom Cabinet

Solder out the FM antenna wire.

D1: Remove screws SP 3x12 - 2 pcs.

E. Remove Main PCB Assy

E1: Remove screws SP 3x10 (Washer head) - 2 pcs.

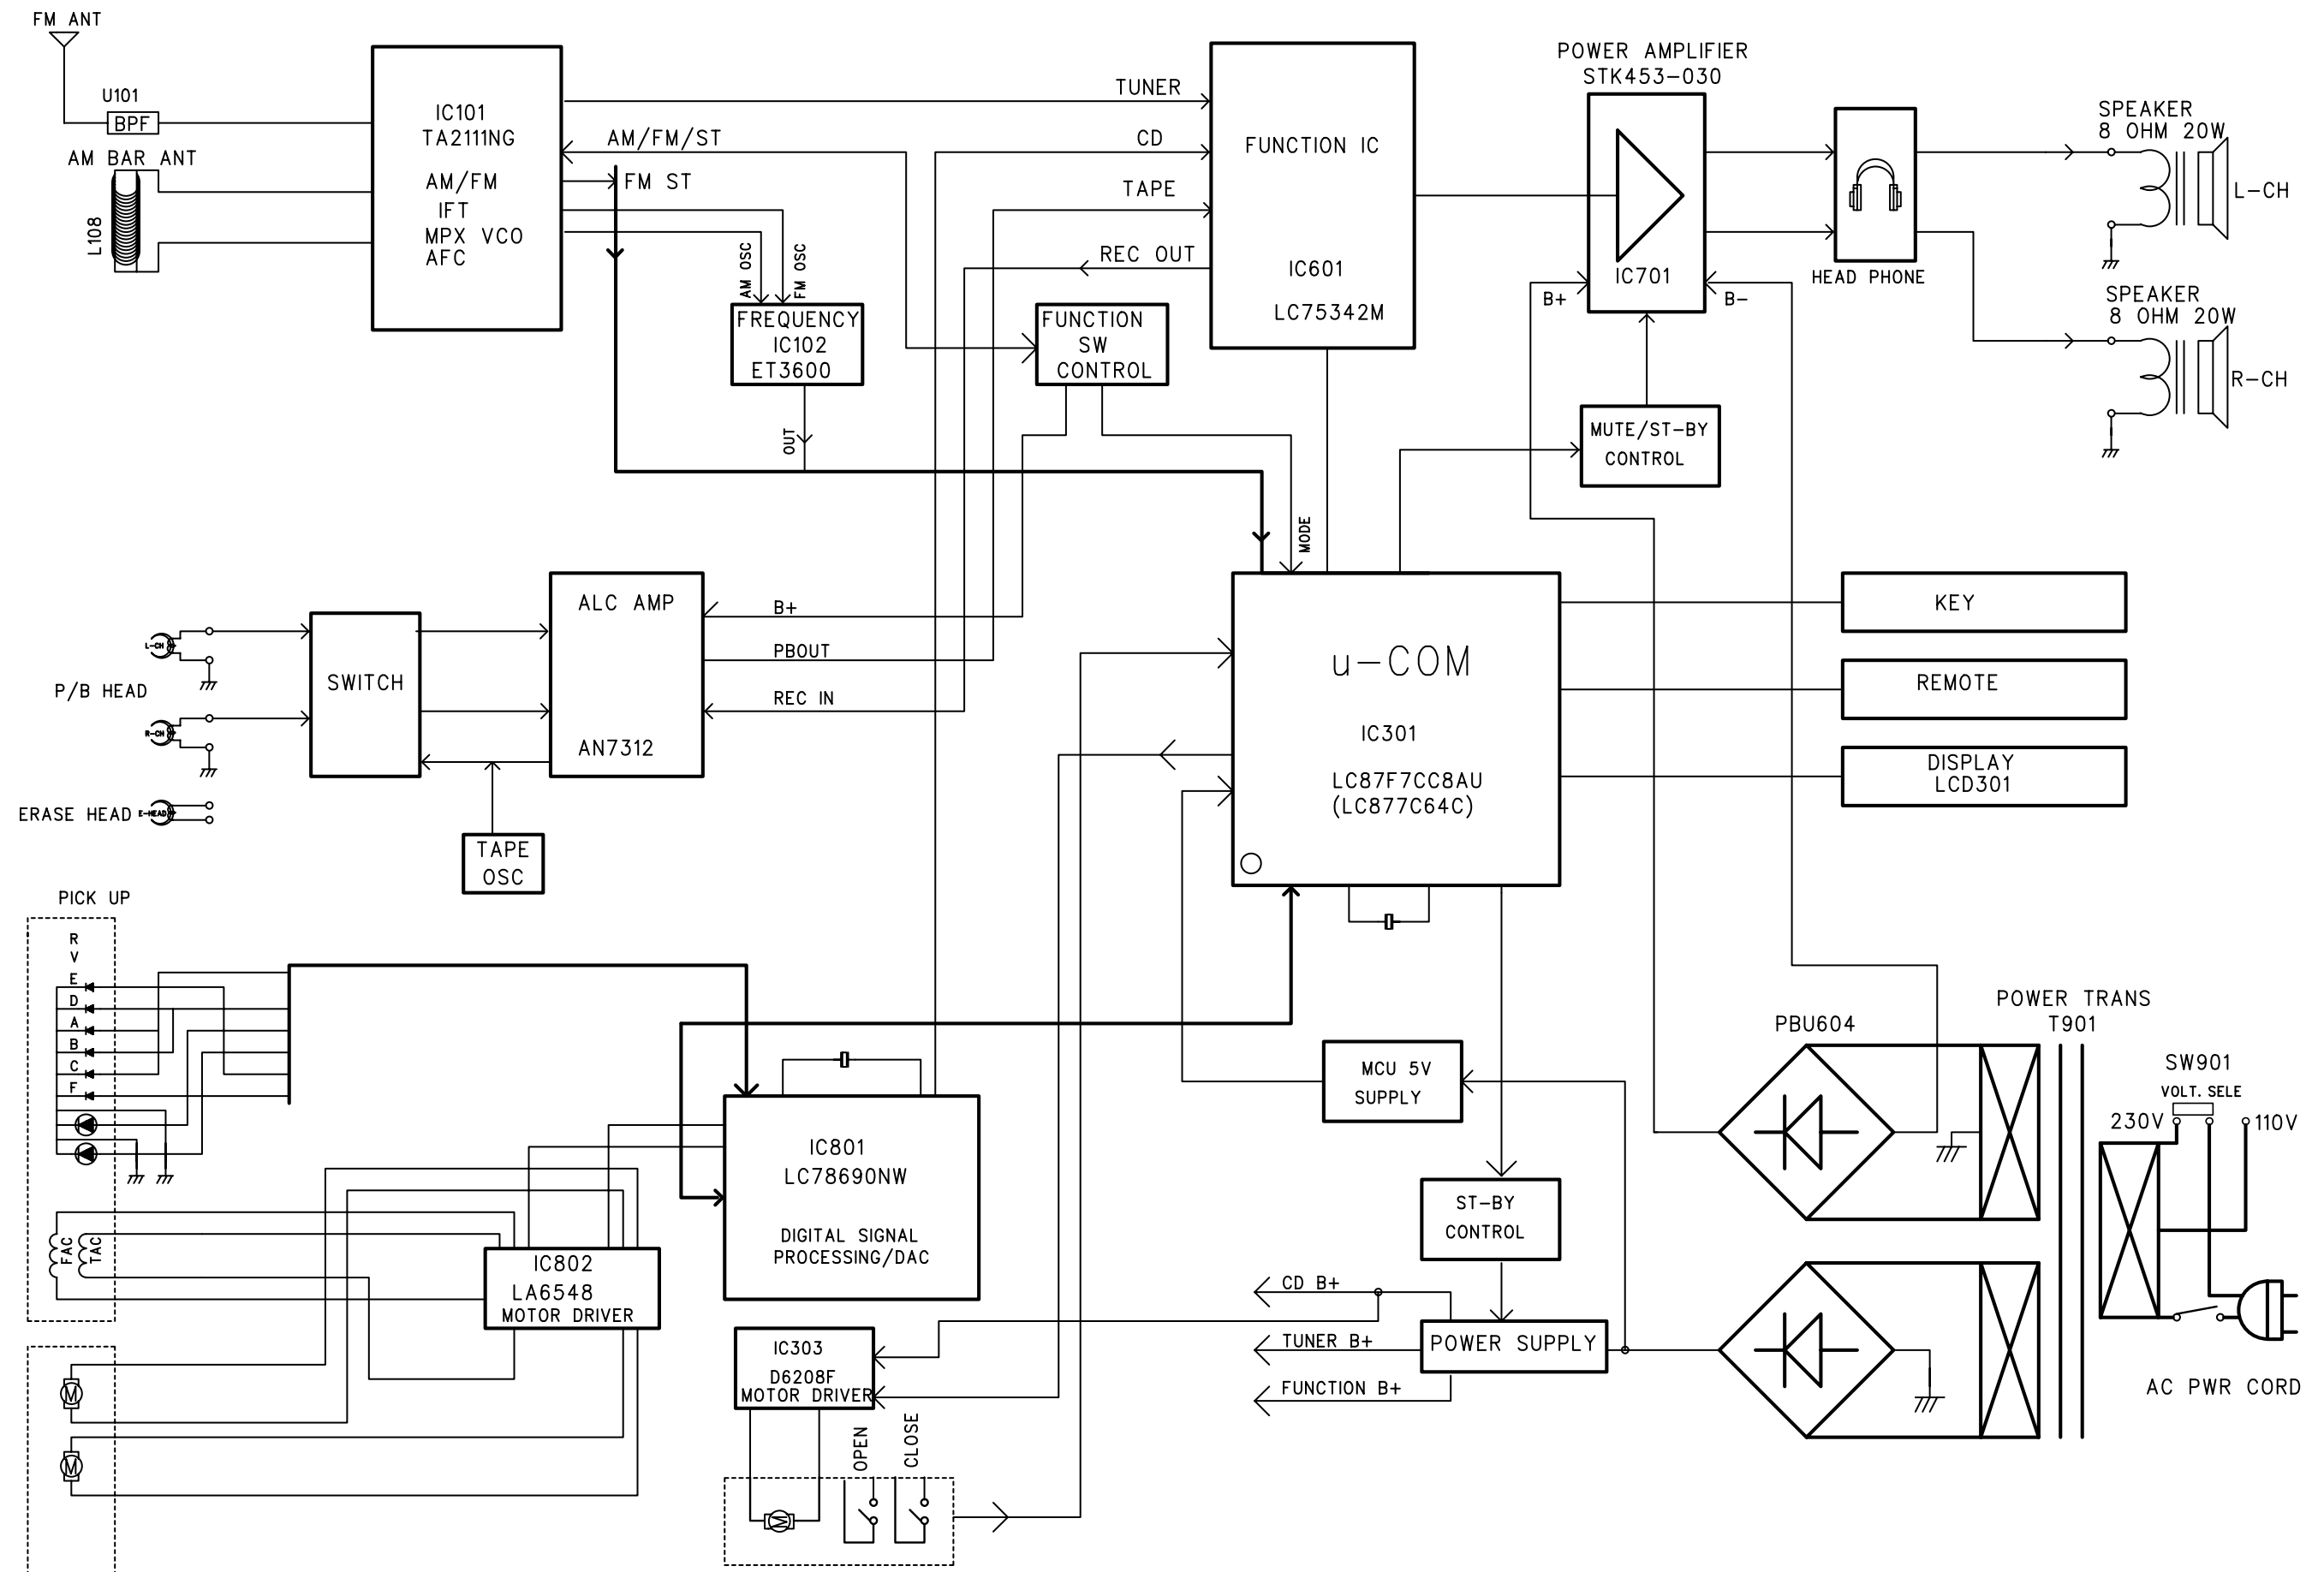

F. Remove Key Board Assembly

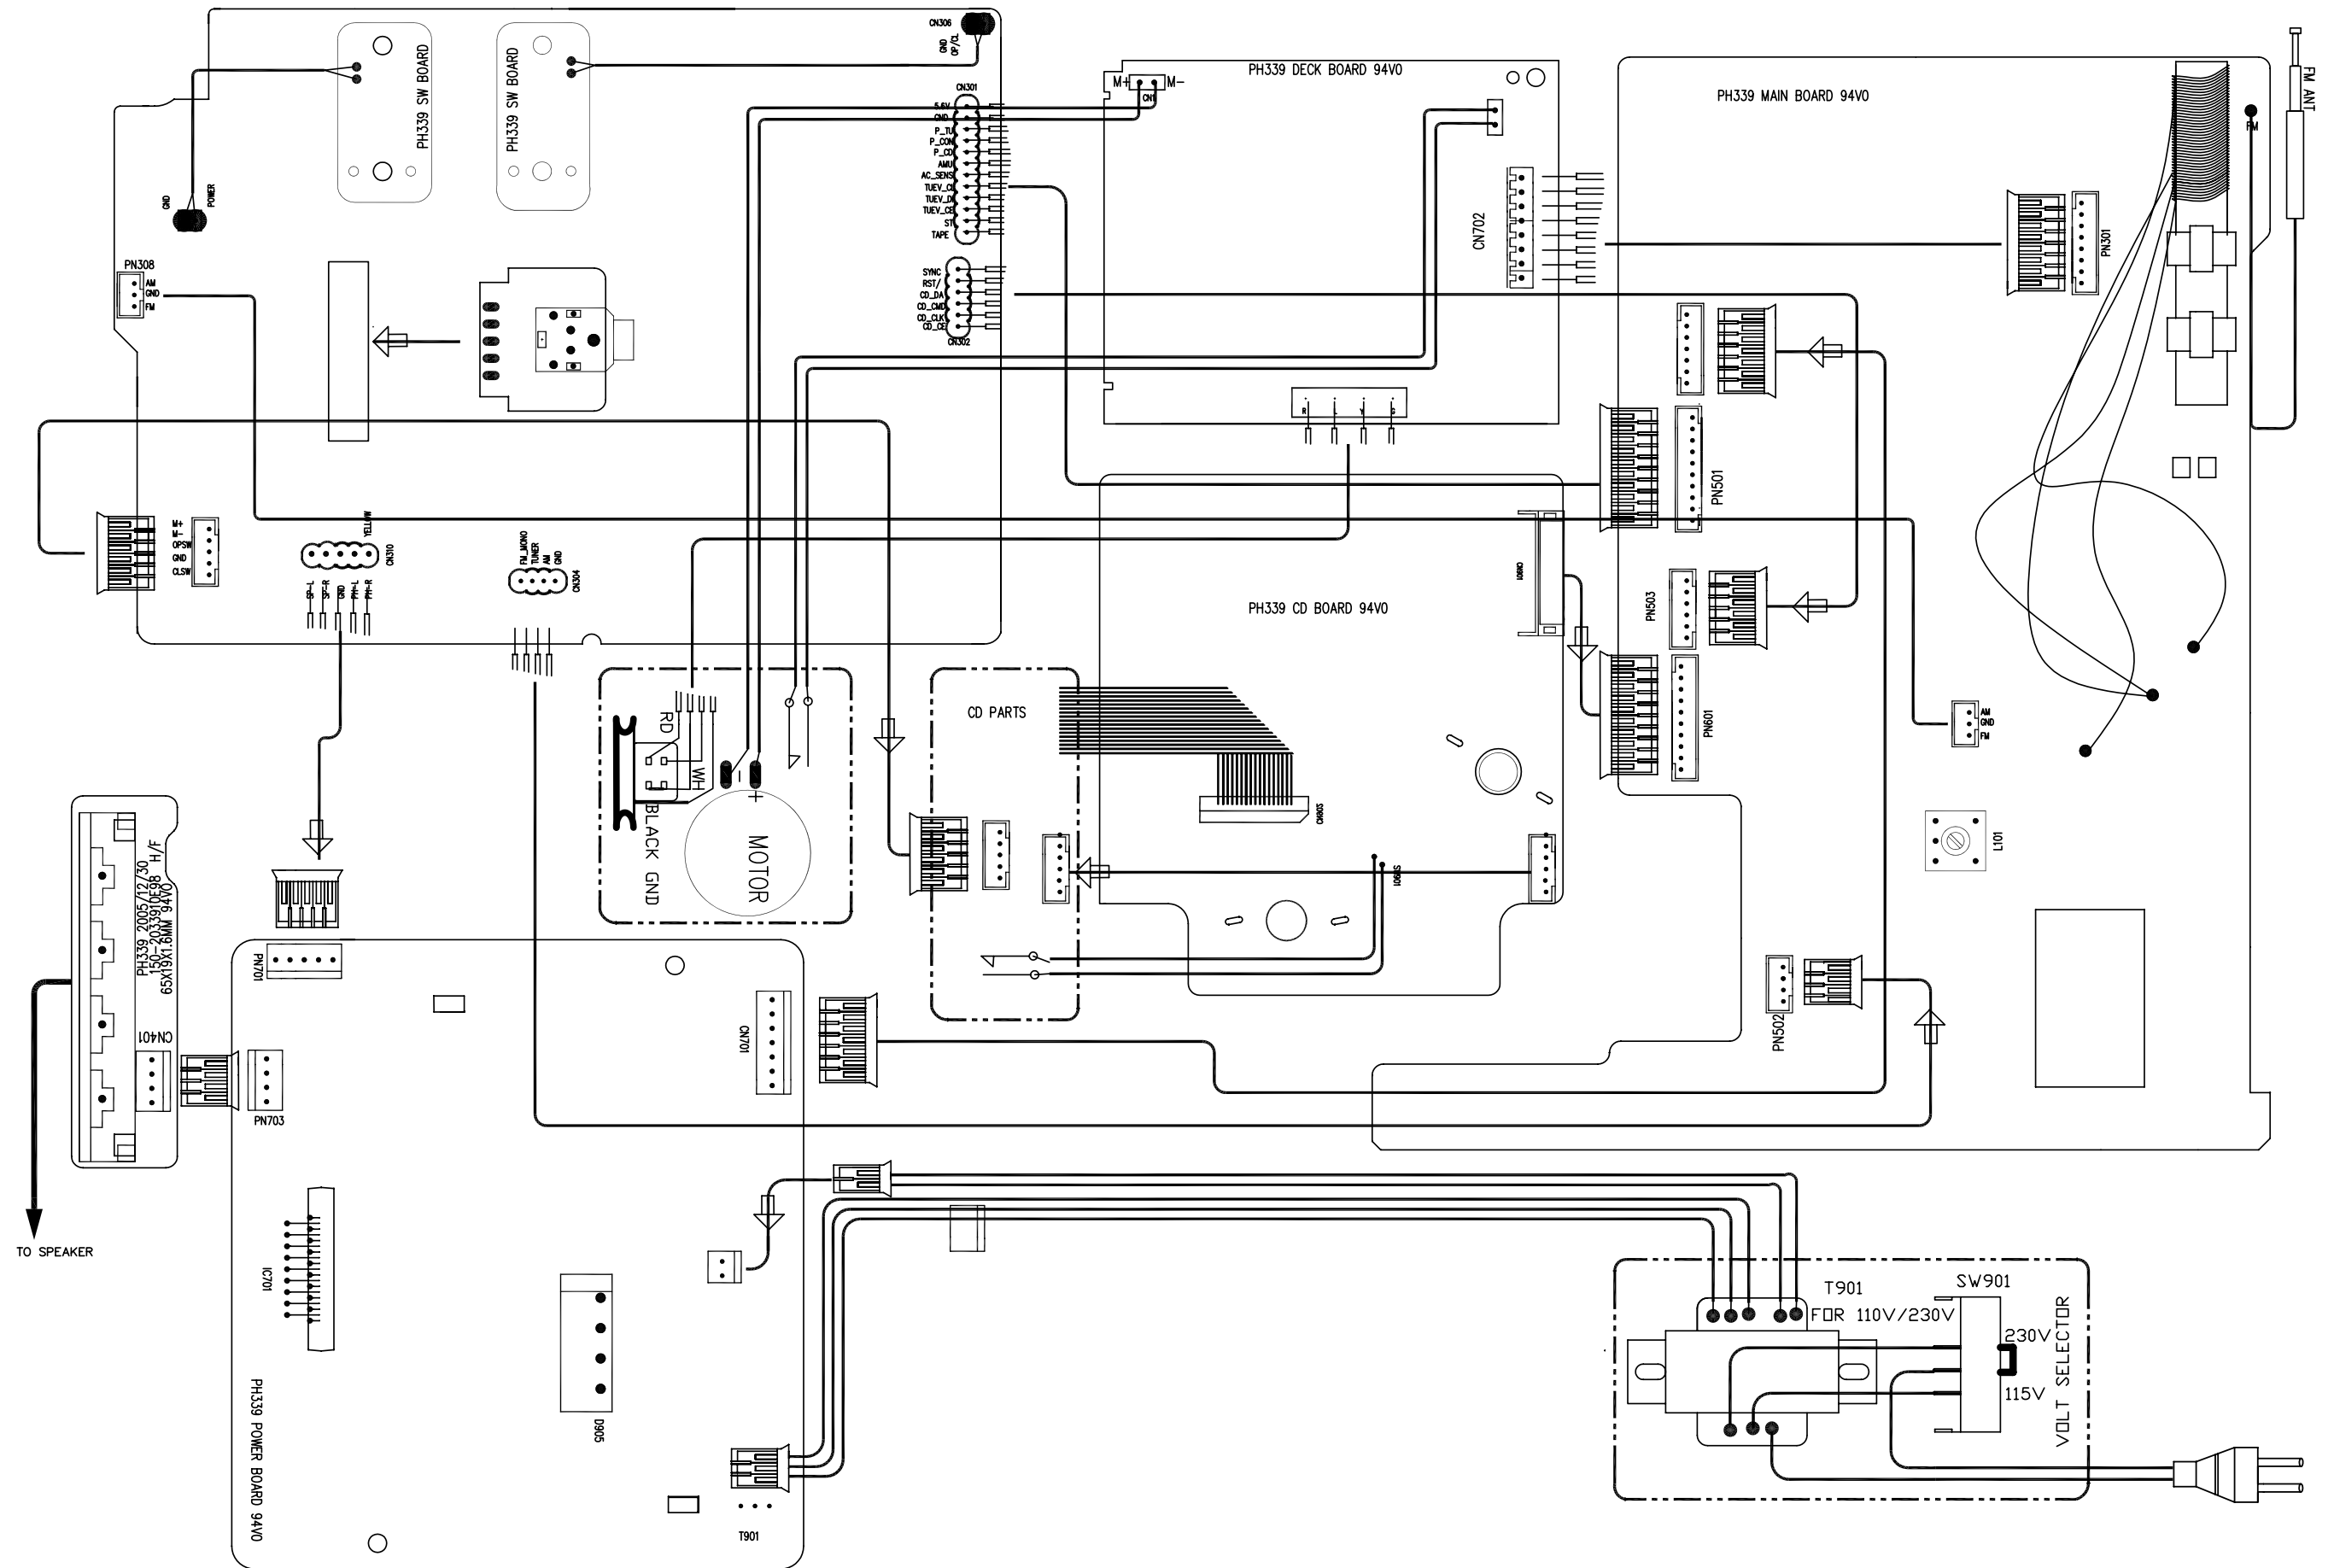

F1: Remove screws SP 3x10 - 10 pcs.

F2: Remove screws SP 3x10 - 4 pcs.
