

# Service Manual

CD Stereo System

Model No. **SA-AKX17PH**  
**SA-AKX17PN**

Product Color: (K)...Black Type

Please refer to the original service manual for:

- CD Mechanism Unit (BRS11C), Order No. PSG1102001CE
- Speaker system SB-AKX16PN-K, Order No. PSG1301013CE

## ⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

## IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by ⚠ in the Schematic Diagrams, Circuit Board Diagrams, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire or other hazards. Do not modify the original design without permission of manufacturer.

# 1 Safety Precautions

## 1.1. General Guidelines

### 1. IMPORTANT SAFETY NOTICE

- There are special components used in this equipment which are important for safety. These parts are marked by  $\triangle$  in the Schematic Diagrams, Circuit Board Layout, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent X-RADIATION, shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.
1. An Isolation Transformer should always be used during the servicing of AC Adaptor whose chassis is not isolated from the AC power line. Use a transformer of adequate power rating as this protects the technician from accidents resulting in personal injury from electrical shocks. It will also protect AC Adaptor from being damaged by accidental shorting that may occur during servicing.
  2. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.
  3. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
  4. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

### 1.1.1. Leakage Current Cold Check

1. Unplug the AC cord and connect a jumper between the two prongs on the plug.
2. Measure the resistance value, with an ohmmeter, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. When the exposed metallic part has a return path to the chassis, the reading should be between  $1M\Omega$  and  $5.2M\Omega$ .  
When the exposed metal does not have a return path to the chassis, the reading must be  $\infty$

### 1.1.2. Leakage Current Hot Check

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
2. Connect a  $1.5k\Omega$ , 10 watts resistor, in parallel with a  $0.15\mu F$  capacitors, between each exposed metallic part on the set and a good earth ground such as a water pipe, as shown in Figure 1-1.
3. Use an AC voltmeter, with 1000 ohms/volt or more sensitivity, to measure the potential across the resistor.
4. Check each exposed metallic part, and measure the voltage at each point.
5. Reverse the AC plug in the AC outlet and repeat each of the above measurements.
6. The potential at any point should not exceed 0.75 volts RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current must not exceed 1/2 milliamp. In case a measurement is outside of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.

Figure 1-1

## 1.2. Before Use (For PH only)

Be sure to disconnect the mains cord before adjusting the voltage selector as shown in Figure 1-2.

Use a minus(-) screwdriver to set the voltage selector (on the rear panel) to the voltage setting for the area in which the unit will be used.

Note that this unit will be seriously damaged if this setting is not made correctly. (There is no voltage selector for some countries, the correct voltage is already set.)

Figure 1-2

## 1.3. Before Repair and Adjustment

### Caution:

DO NOT SHORT-CIRCUIT DIRECTLY (with a screw driver blade, for instance), as this may destroy solid state devices.

After repairs are completed, restore power gradually using a variac, to avoid overcurrent.

Current consumption at AC 110~127 V / 220~240 V, 50/60 Hz in Power ON, FM Tuner at volume minimal mode should be ~ 250 mA (PH).

Current consumption at AC 120 V, 60 Hz in Power ON, FM Tuner at volume minimal mode should be ~ 250 mA (PN).

## 1.4. Protection Circuitry

The protection circuitry may have operated if either of the following conditions are noticed:

- No sound is heard when the power is turned on.
- Sound stops during a performance.

The function of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of the amplifier are used.

If this occurs, follow the procedure outlines below:

1. Turn off the power.
2. Determine the cause of the problem and correct it.
3. Turn on the power once again after one minute.

### Note:

When the protection circuitry functions, the unit will not operate unless the power is first turned off and then on again.

### 1.5. Power Supply using SMPS

This model uses Switching Mode Power Supply (SMPS) to provide the power supply to the unit. Here is the supplied part no. for the SMPS Module for the models

- 1) N0AB3GK00008 (For PN)
- 2) N0AD3GK00001 (For PH)

### 1.5.1. For PN

### 1.5.2. For PH

## 1.6. Safety Parts Information

### Safety Parts List:

There are special components used in this equipment which are important for safety.

These parts are marked by ⚠ in the Schematic Diagrams, Exploded View & Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire or other hazards. Do not modify the original design without permission of manufacturer.

Safety	Ref. No.	Part No.	Part Name & Description	Remarks
⚠	8	RGR0443A-E1A	REAR PANEL	PN
⚠	8	RGR0443B-B1A	REAR PANEL	PH
⚠	26	RKM0713-K1	TOP CABINET	
⚠	301	RAE1036Z-V	TRAVERSE ASS'Y	
⚠	A2	K2CQ2YY00119	AC CORD	PH
⚠	A2	K2CB2CB00022	AC CORD	PN
⚠	A3	RQT9843-1M	O/I BOOK (Sp/En)

⚠	PCB8	N0AB3GK00008	SMPS MODULE P.C.B.	PN

## 2 Warning

### 2.1. Prevention of Electrostatic Discharge (ESD) to Electrostatically Sensitive (ES) Devices

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices.

Examples of typical ES devices are IC (integrated circuits) and some field-effect transistors and semiconductor "chip" components.

The following techniques should be used to help reduce the incidence of component damage caused by electrostatic discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static (ESD protected)" can generate electrical charge sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

**CAUTION:**

Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).

#### IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by  in the Schematic Diagrams, Circuit Board Diagrams, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire or other hazards. Do not modify the original design without permission of manufacturer.

## 2.2. Precaution of Laser Diode

**CAUTION:**

THIS PRODUCT UTILIZES A LASER.

USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

**Caution:**

This product utilizes a laser diode with the unit turned “on”, invisible laser radiation is emitted from the pickup lens.

Wavelength: 790 nm (CD)

Maximum output radiation power from pickup: 100  $\mu$ W/VDE

Laser radiation from the pickup unit is safety level, but be sure the followings:

1. Do not disassemble the pickup unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pickup unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pickup lens for a long time.

## 2.3. Service caution based on Legal restrictions

### 2.3.1. General description about Lead Free Solder (PbF)

The lead free solder has been used in the mounting process of all electrical components on the printed circuit boards used for this equipment in considering the globally environmental conservation.

The normal solder is the alloy of tin (Sn) and lead (Pb). On the other hand, the lead free solder is the alloy mainly consists of tin (Sn), silver (Ag) and Copper (Cu), and the melting point of the lead free solder is higher approx.30 degrees C (86°F) more than that of the normal solder.

#### Definition of PCB Lead Free Solder being used

The letter of "PbF" is printed either foil side or components side on the PCB using the lead free solder. (See right figure)	PbF
---	-----

#### Service caution for repair work using Lead Free Solder (PbF)

- The lead free solder has to be used when repairing the equipment for which the lead free solder is used.  
(Definition: The letter of "PbF" is printed on the PCB using the lead free solder.)
- To put lead free solder, it should be well molten and mixed with the original lead free solder.
- Remove the remaining lead free solder on the PCB cleanly for soldering of the new IC.
- Since the melting point of the lead free solder is higher than that of the normal lead solder, it takes the longer time to melt the lead free solder.
- Use the soldering iron (more than 70W) equipped with the temperature control after setting the temperature at 350±30 degrees C (662±86°F).

#### Recommended Lead Free Solder (Service Parts Route.)

- The following 3 types of lead free solder are available through the service parts route.  
RFKZ03D01K----- (0.3mm 100g Reel)  
RFKZ06D01K----- (0.6mm 100g Reel)  
RFKZ10D01K----- (1.0mm 100g Reel)

#### Note

- \* Ingredient: tin (Sn), 96.5%, silver (Ag) 3.0%, Copper (Cu) 0.5%, Cobalt (Co) / Germanium (Ge) 0.1 to 0.3%

## 2.4. Handling Precautions for Traverse Unit

The laser diode in the optical pickup unit may break down due to static electricity of clothes or human body. Special care must be taken avoid caution to electrostatic breakdown when servicing and handling the laser diode in the traverse unit.

### 2.4.1. Cautions to Be Taken in Handling the Optical Pickup Unit

The laser diode in the optical pickup unit may be damaged due to electrostatic discharge generating from clothes or human body. Special care must be taken avoid caution to electrostatic discharge damage when servicing the laser diode.

1. Do not give a considerable shock to the optical pickup unit as it has an extremely high-precise structure.
2. To prevent the laser diode from the electrostatic discharge damage, the flexible cable of the optical pickup unit removed should be short-circuited with a short pin or a clip.
3. The flexible cable may be cut off if an excessive force is applied to it. Use caution when handling the flexible cable.
4. The antistatic FPC is connected to the new optical pickup unit. After replacing the optical pickup unit and connecting the flexible cable, cut off the antistatic FPC.

Figure A

Figure 2-2

## 2.5. Grounding for electrostatic breakdown prevention

- As for parts that use optical pick-up (laser diode), the optical pick-up is destroyed by the static electricity of the working environment.

Repair in the working environment that is grounded.

### 2.5.1. Worktable grounding

- Put a conductive material (sheet) or iron sheet on the area where the optical pickup is placed and ground the sheet.

### 2.5.2. Human body grounding

- Use the anti-static wrist strap to discharge the static electricity from your body Figure 2-3.

Figure 2-3

## 3 Service Navigation

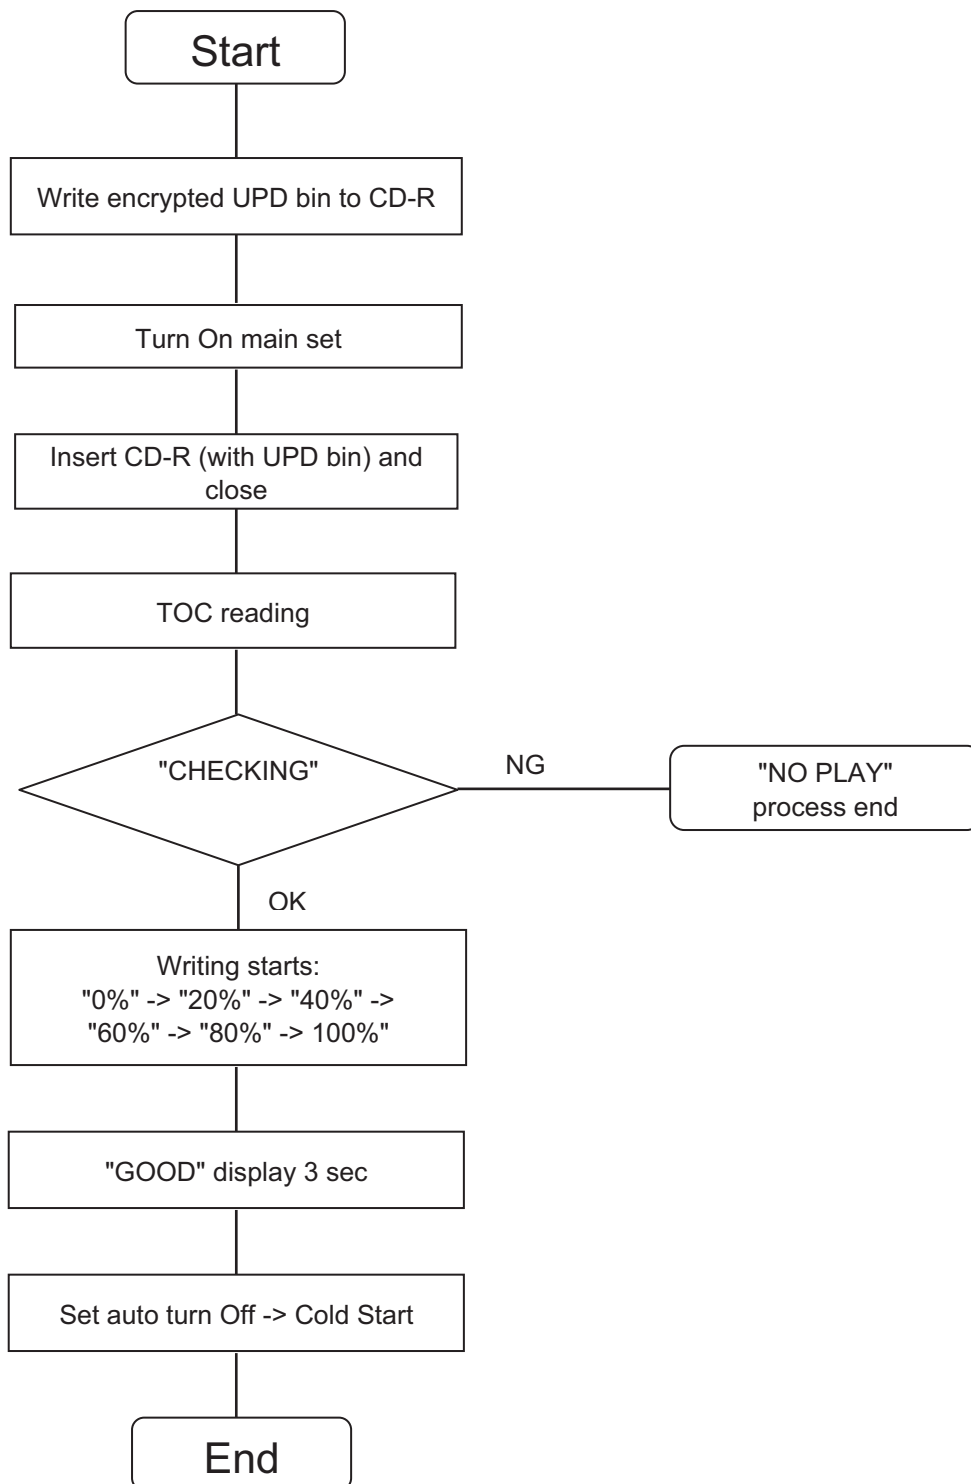

### 3.1. Service Information

This service manual contains technical information which will allow service personnel's to understand and service this model.

Please place orders using the parts list and not the drawing reference numbers.

If the circuit is changed or modified, this information will be followed by supplement service manual to be filed with original service manual.

#### 3.1.1. Firmware Update Procedure

## 4 Specifications

### ■ Amplifier section

#### RMS output power stereo mode

Front Ch (both ch driven)	175 W per channel (4 Ω), 1 kHz, 30% THD
Total RMS stereo mode power	350 W (30% THD)

### ■ Tuner, terminals section

Preset memory	FM 30 stations AM 15 stations
---------------	----------------------------------

### Frequency modulation (FM)

Frequency range	87.50 MHz to 108.00 MHz (50 kHz step) (for PH) 87.5 MHz to 108.0 MHz (100 kHz step) (for PN) 87.9 MHz to 107.9 MHz (200 kHz step) (for PN)
Antenna terminals	75 Ω (unbalanced)

### Amplitude modulation (AM)

Frequency range	522 kHz to 1629 kHz (9 kHz step) (for PH) 520 kHz to 1630 kHz (10 kHz step) (for PH) 520 kHz to 1710 kHz (10 kHz step) (for PN)
-----------------	--

Aux Input	Pin jack
-----------	----------

### ■ Disc section

Discs played (8 cm or 12 cm)	CD, CD-R/RW(CD-DA, MP3*)
------------------------------	--------------------------

### Pick up

Wavelength	790 nm(CD)
------------	------------

### Audio output

Number of channels	2 ch (FL, FR)
FL = Front left channel	
FR = Front right channel	
*MPEG-1 Layer 3	

### ■ USB section

#### USB Port

USB standard	USB 2.0 full speed
Media file format support	MP3 (*.mp3)
USB device file system	FAT12, FAT16, FAT32
USB port power	500 mA (max)
Bit rate	16 kbps to 320 kbps (playback)

#### USB recording

Bit rate	128 kbps
USB recording speed	1x, 3x max (CD only)
Recording file format	MP3 (*.mp3)

### ■ General

Power consumption	58 W (for PH) 55 W (for PN)
-------------------	--------------------------------

Power Consumption in standby mode	0.4 W (approximate) (for PH) 0.3 W (approximate) (for PN)
-----------------------------------	---

Power supply	AC 110 to 127/220 to 240 V, 50/60 Hz (for PH) AC 120 V, 60 Hz (for PN)
--------------	--

Dimensions (W x H x D)	220 mm x 334 mm x 250 mm
------------------------	--------------------------

Mass	2.8 kg
------	--------

Operating temperature range	0 °C to +40 °C
-----------------------------	----------------

Operating humidity range	35% to 80% RH (no condensation)
--------------------------	------------------------------------

1. Specifications are subject to change without notice.  
Mass and dimension are appropriate
2. Total harmonic distortion is measured by the digital spectrum analyzer.

### ■ System: SC-AKX17PN-K

Main Unit: SA-AKX17PN-K  
Front Speakers: SB-AKX16PN-K

### ■ System: SC-AKX17PH-K

Main Unit: SA-AKX17PH-K  
Front Speakers: SB-AKX16PN-K

# 5 General/Introduction

## 5.1. Media Information

### Note on disc

- This system can play CD-R/RW with CD-DA or MP3 format content.
- Some CD-R/RW cannot be played because of the condition of the recording.
- MP3 files are defined as tracks and folders are defined as albums.
- This system can access up to:
  - CD-DA: 99 tracks
  - MP3: 999 tracks, 255 albums and 20 sessions
- Disc must conform to ISO9660 level 1 or 2 (except for extended formats).
- Recordings will not necessarily be played in the order you recorded them.

MPEG Layer-3 audio coding technology licensed from Fraunhofer IIS and Thomson.
---

## 6 Location of Controls and Components

### 6.1. Remote Control Key Button Operation

- 1 Standby/on switch** [⏻], [⏻/⏺]  
Press to switch the unit from on to standby mode or vice versa. In standby mode, the unit is still consuming a small amount of power.
- 2** Numeric buttons [1 to 9, 0, ≥10]  
To select a 2-digit number  
Example: 16: [≥10]→[1]→[6]
- 3** Delete a programmed track
- 4** Select audio source
- 5** Basic playback control
- 6** Select the sound effects
- 7** Auto preset the radio station
- 8** View content information  
**Decrease the brightness of the display panel**  
Press and hold [– DIMMER] on the remote control or press [DIMMER] on the main unit to use this function. To cancel, do the above step again.
- 9** Recording operation control
- 10** Set the clock and timer
- 11** Set the program function
- 12** Adjust the volume of the system
- 13 Mute the sound of the system**  
Press the button again to cancel.  
“MUTE” is also canceled when you adjust the volume or when you switch off the system.
- 14** Set the play menu item
- 15** Set the radio menu item
- 16** Select the option
- 17 Automatically switch off the system**  
When you are in disc, USB or AUX source, the auto off function switches off the system if you do not use the system for 30 minutes.  
To cancel, press the button again.
- 18** Set the edit mode for USB

## 6.2. Main Unit Key Button Operation

### 1 Standby/on switch [⏻], [⏻/⏹]

Press to switch the unit from on to standby mode or vice versa. In standby mode, the unit is still consuming a small amount of power.

### 4 Select audio source

### 5 Basic playback control

### 6 Select the sound effects

### 8 View content information

#### Decrease the brightness of the display panel

Press and hold [– DIMMER] on the remote control or press [DIMMER] on the main unit to use this function. To cancel, do the above step again.

### 9 Recording operation control

### 12 Adjust the volume of the system

### 19 Remote control sensor

Distance: Within approximately 7 m

Angle: Approximately 20° up and down, 30° left and right

### 20 USB port (⏻)

USB recording indicator

### 21 Display panel

### 22 Open or close the disc tray

### 23 Disc tray

# 7 Installation Instructions

## 7.1. Speaker and A/C Connection

**Connect the AC power supply cord only after all the other connections have been made.**

The illustrations shown are of the model for South America (except Argentina and Brazil). Your unit may differ in appearance.

### 1 Connect the AM loop antenna.

Stand the antenna up on its base until it clicks.

### 2 Connect the FM indoor antenna.

Place the antenna where reception is best.

### 3 Connect the speakers.

Connect the speaker cables to the terminals of the same color.

Be careful not to cross (short-circuit) or reverse the polarity of the speaker wires as doing so may damage the speakers.

### 4 For South America (except Argentina and Brazil)

Set the voltage.

Use a flat-head screwdriver to set the voltage selector to the AC voltage in your area.

### 5 Connect the AC power supply cord.

### For South America (except Argentina and Brazil)

If the power plug does not fit your socket, use the power plug adapter (supplied).

Do not use an AC power supply cord from other equipment.

### Conserving power

The system consumes a small amount of power even when it is in standby mode. Disconnect the power supply if you do not use the system. Some settings will be lost after you disconnect the system. You have to set them again.

## 8 Service Mode

### 8.1. Cold-Start

Here is the procedure to carry out cold-start or initialize to shipping mode.

1. Unplug AC power cord
2. Press & hold [POWER] button
3. Plug AC power cord while [POWER] button being pressed  
FL Display will show “\_ \_ \_ \_ \_ \_ \_ \_”
4. Release [POWER] button

## 8.2. Doctor Mode Table

### 8.2.1. Doctor Mode Table 1

Item		FL Display	Key Operation
Mode Name	Description		Front Key
Doctor Mode	To enter into Doctor Mode		<p>In CD Mode:</p> <ol style="list-style-type: none"> <li>1. Press [■] button on main unit follow by [4] and [7] on remote control.</li> <li>2. To exit, press [DELETE] button on remote control or, press [POWER, ⏻/I] button on Main Unit</li> </ol>
EEPROM checksum check	Displaying of 1. Year Develop. 2. Model Type. 3. ROM Type. 4. Firmware Version.	<p>(Display 1)</p>  <p>Version No. (001 ~ 999) → specific for each firmware</p> <p>(Display 2)</p> 	<p>In CD mode:</p> <ol style="list-style-type: none"> <li>1. Enter into Doctor Mode</li> </ol>
Cold Start	To active cold start upon next AC power up when reset start is execute the next time.		<p>In Doctor Mode:</p> <ol style="list-style-type: none"> <li>1. Press [SLEEP] button on the remote control.</li> </ol>

## 8.2.2. Doctor Mode Table 2

Item		FL Display	Key Operation
Mode Name	Description		Front Key
Volume Setting Check	To check the volume setting of the main unit.	 <p>Press [7]: VOL50 Press [8]: VOL35 Press [9]: VOL0</p>	In Doctor Mode: 1. Press [7], [8], [9] button on the remote control.
FL Display Check	To check the FL segment display. All segments will light up while all LED blink at 0.5s intervals.		In Doctor mode: 1. Press [1] button on the remote control. 2. To cancel this mode, press [0] button on the remote control.
Traverse Test	To determine the traverse unit operation for inner & outer access track.  In this mode, ensure the CD is in the main unit.  Note: Refer to Section 8.3 Figure 8-2 for process flow	 <p>The counter will increment by one. When reach 99999999 will change to 00000000 Cancellation Display</p> 	In Doctor Mode: 1. Press [10] → [1] → [2] button on the remote control.  2. To cancel this mode, press [0] button on the remote control.
Reliability Test (Combination)	To determine the traverse unit operation & open/close operation of the mechanism.  In this mode, ensure the CD is in the main unit.  Note: Refer to Section 8.3 Figure 8-3 for process flow	 <p>The counter will increment by one. When reach 99999999 will change to 00000000 Cancellation Display</p> 	In Doctor Mode: 1. Press [10] → [1] → [5] button on the remote control.  2. To cancel this mode, press [0] button on the remote control.
Loading Test	To determine the open & close operation of the CD Mechanism Unit.  In this mode, the tray will open & close automatically.  Note: Refer to Section 8.3 Figure 8-1 for process flow	 <p>The counter will increment by one. When reach 99999999 will change to 00000000 Cancellation Display</p> 	In Doctor Mode: 1. Press [10] → [2] → [1] button on the remote control.  2. To cancel this mode, press [0] button on the remote control.

### 8.3. Reliability Test Mode (CD Mechanism Unit)

Below is the process flow chart of the aging test for the CD Mechanism Unit.

Figure 8-1 Reliability Test (Loading)

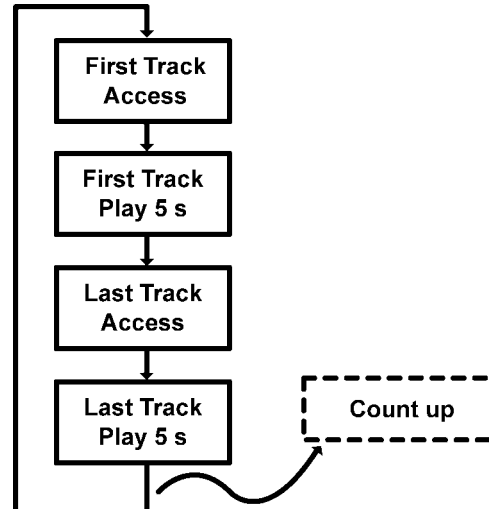

Figure 8-2 Reliability Test (Traverse)

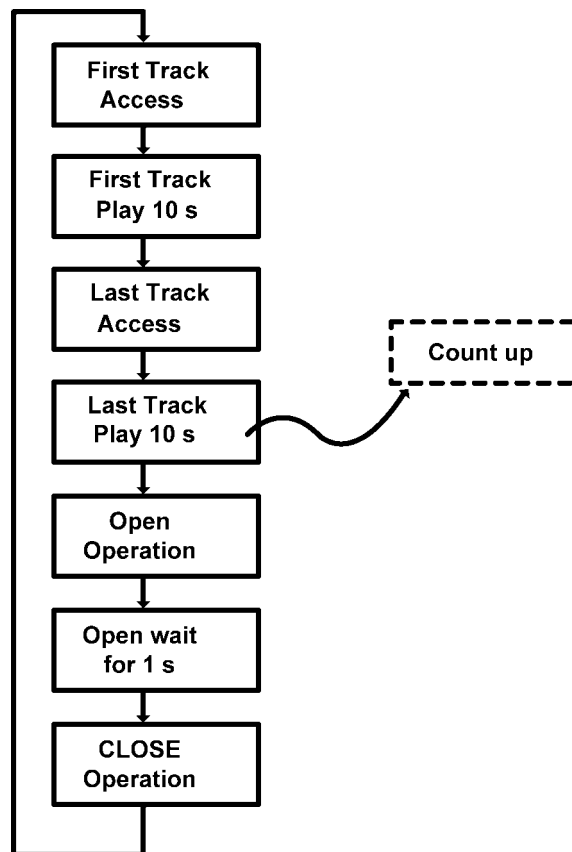

Figure 8-3 Reliability Test (Combination)

## 8.4. Self-Diagnostic Mode

Item		FL Display	Key Operation
Mode Name	Description		Front Key
Self Diagnostic Mode	To enter into self diagnostic checking		Step 1: Select CD mode (Ensure no disc is inserted).  Step 2: Press & hold [■] button follow by [▶▶/▶▶▶] on main unit for 2 seconds.
Error code information	System will perform a check on any unusual/error code from the memory	Example: 	Step 1: In self diagnostic mode, Press [■] on main unit.  To exit, press [⏏/1] on main unit or remote control.
Delete error code	To clear the stored in memory (EEPROM IC)		Step 1: In self diagnostic mode, Press [0] on remote control.  To exit, press [⏏/1] on main unit or remote control.

## 8.5. Self-Diagnostic Error Code Table

Self-Diagnostic Function (Refer Section 8.4. Self-Diagnostic Mode) provides information on any problems occurring for the unit and its respective components by displaying the error codes. These error code such as U\*\*, H\*\* and F\*\* are stored in memory and held unless it is cleared.

The error code is automatically display after entering into self-diagnostic mode.

### 8.5.1. Power Supply Error Code Table

Error Code	Diagnosis Contents	Description of error	Automatic FL Display	Remarks
F61	Power Amp IC output abnormal	Upon power on, PCONT=HIGH, DC_DET_AMP after checking LSI.		Press [■] on main unit for next error.
F76		DC_DET_PWR		
F61-76		Both DCDT (NG)		

### 8.5.2. CD Mechanism Error Code Table

Error Code	Diagnostic Contents	Description of error	Automatic FL Display	Remarks
CD H15	CD Open Abnormal	During operation POS_SW_R On fail to be detected with 4 sec. Error No. shall be clear by force or during cold start.		Press [■] on main unit for next error.
CD H16	CD Closing Abnormal	During operation POS_SW_CEN On fail to be detected with 4 sec. Error No. shall be clear by force or during cold start.		Press [■] on main unit for next error.
F26	Communication between CD servo LSI and micro-p abnormal.	During switch to CD function, if SENSE = "L" within failsafe time of 20ms.		Press [■] on main unit for next error.

## 8.6. Sales Demonstration Lock Function

### 8.6.1. Entering into Sales demonstration lock mode

Here is the procedures to enter into the Sales demonstration lock mode.

Step 1: Turn on the unit.

Step 2: Select to any mode function.

Step 3: Press and hold [▲OPEN/CLOSE] and [CD] keys for 5 sec or more.

The display will show upon entering into this mode for 2 sec..

Note: [▲OPEN/CLOSE] button is invalid and the main unit displays "LOCKED" while the lock function mode is entered.

### 8.6.2. Cancellation of Sales demonstration lock mode

Step 1: Turn on the unit.

Step 2: Select to any mode function.

Step 3: Set volume to Vol 19.

Step 4: Press and hold [▲OPEN/CLOSE] and [CD] keys for 5 sec or more.

The display will show upon entering into this mode for 2 sec..

## 9 Troubleshooting Guide

“Contents for this section is not available at time of issue”

# 10 Disassembly and Assembly Instructions

- Illustration is based on SA-AKX17PH-K.

## Caution Note:

- This section describes the disassembly and/or assembly procedures for all major printed circuit boards & main components for the unit. (You may refer to the section of “Main components and P.C.B Locations” as described in the service manual)
- Before carrying out the disassembly process, please ensure all the safety precautions & procedures are followed.
- During the disassembly and/or assembly process, please handle with care as there may be chassis components with sharp edges.
- Avoid touching heatsinks due to its high temperature after prolong use. (See caution as described below)

**CAUTION: HOT!!  
PLEASE DO NOT  
TOUCH THE HEAT SINK**

- During disassembly and assembly, please ensure proper service tools, equipments or jigs is being used.
- During replacement of component parts, please refer to the section of “Replacement Parts List” as described in the service manual.
- Select items from the following indexes when disassembly or replacement are required.
- Disassembly of Top Cabinet
- Disassembly of Front Panel Unit
- Disassembly of Panel P.C.B. and LCD P.C.B.
- Disassembly of Remote Sensor P.C.B.
- Disassembly of USB P.C.B.
- Disassembly of CD Lid
- Disassembly of Rear Panel
- Disassembly of Main P.C.B.
- Disassembly of SMPS Module and Voltage Selector P.C.B.
- Disassembly of CD Mechanism Unit
- Disassembly of CD Interface P.C.B.

## 10.1. Screw Types

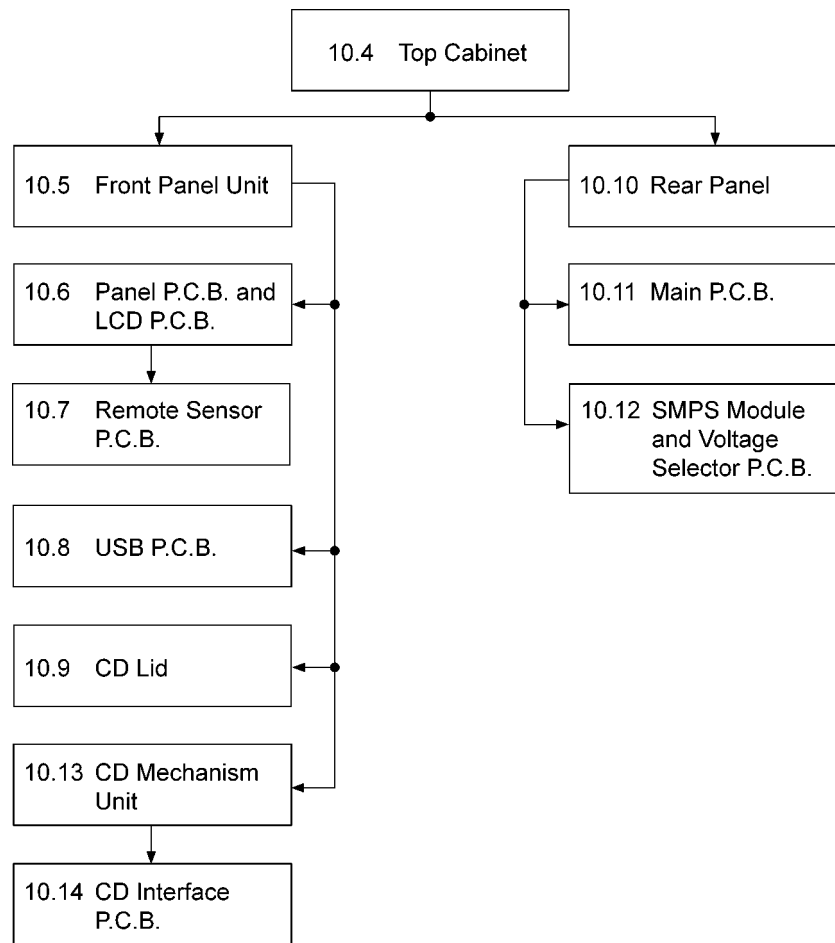

### CAUTION NOTE:

Please use original screw and at correct locations.

Below shown is part no. of different screw types used:

- |                        |                      |
|------------------------|----------------------|
| <b>a</b> :RHD30007-K2J | <b>e</b> :RHD26043-1 |
| <b>b</b> :RHD30119-S   | <b>f</b> :RHDX031008 |
| <b>c</b> :RHD26046-L   | <b>g</b> :XTN2+6GFJ  |
| <b>d</b> :RHD30111-31  |                      |

## 10.2. Disassembly Flow Chart

10.3. Main Components and P.C.B. Locations

## 10.4. Disassembly of Top Cabinet

**Step 1** Remove 2 screws on each side.

(Left View)

**a** x 2  
(Step 1)

(Right View)

**a** x 2  
(Step 1)

**Step 2** Remove 5 screws.

**Step 3** Release both sides of Top Cabinet outwards as arrow shown.

(Back View)

Rear Panel

**Step 4** Slightly lift up to remove the Top Cabinet.

**Caution:** During assembling, ensure that the Top Cabinet is inserted properly into the Front Panel Unit as shown.

## 10.5. Disassembly of Front Panel Unit

• Refer to “Disassembly of Top Cabinet”.

**Step 1** Detach 5P Cable Wire at the connector (CN2002) on Main P.C.B.

**Step 2** Detach 17P FFC at the connector (CN2000) on Main P.C.B.

**Step 3** Release tabs on both side of the Front Panel Unit.

**Step 4** Release tabs at bottom of unit.

**Step 5** Detach to remove the Front Panel Unit

## 10.6. Disassembly of Panel P.C.B. and LCD P.C.B.

- Refer to “Disassembly of Top Cabinet”.
- Refer to “Disassembly of Front Panel Unit”.

**Step 1** Remove Volume Knob.

**Step 2** Remove 6 screws.

**Step 3** Release catches in sequences (1-6).

**Step 4** Slightly lift up Panel P.C.B.

**Step 5** Remove 2 screws.

**Step 6** Remove the Panel P.C.B. and LCD P.C.B..

## 10.7. Disassembly of Remote Sensor P.C.B.

- Refer to "Disassembly of Top Cabinet".
- Refer to "Disassembly of Front Panel Unit".
- Refer to "Disassembly of Panel P.C.B. and LCD P.C.B.."

**Step 1** Remove Remote Sensor P.C.B.

**Caution:** During assembling, ensure that the Remote Sensor P.C.B. is properly inserted & fully attached to Panel P.C.B.

## 10.8. Disassembly of USB P.C.B.

- Refer to "Disassembly of Top Cabinet".
- Refer to "Disassembly of Front Panel Unit".
- Refer to "Disassembly of Panel P.C.B. and LCD P.C.B.."

**Step 1** Remove 1 screw.

**Step 2** Remove 1 catch.

**Step 3** Remove USB P.C.B..

## 10.9. Disassembly of CD Lid

- Refer to "Disassembly of Top Cabinet".
- Refer to "Disassembly of Front Panel Unit".

**Step 1** Remove the spring in order of sequence (1) to (3).

**Step 2 Remove CD Lid.**

## 10.10. Disassembly of Rear Panel.

• Refer to “Disassembly of Top Cabinet”.

**Step 1 Remove 9 screws.**

**Step 2 Detach Voltage Selector P.C.B..**

**Step 3 Lift up Inner Chassis Unit to release the catches between the Inner Chassis Unit and the Rear Panel.**

- Step 4** Release 2 tabs.  
**Step 5** Release Rear Panel.

## 10.11. Disassembly of Main P.C.B.

- Refer to “Disassembly of Top Cabinet”.
- Refer to “Disassembly of Rear Panel”.

- Step 1** Detach 13P Cable Wire at the connector (CON2) on SMPS P.C.B..  
**Step 2** Detach 24P FFC at the connector (FP8201) on Main P.C.B..  
**Step 3** Detach 10P FFC at the connector (CN8251) on Main P.C.B..  
**Step 4** Remove 2 screws.

- Step 5** Remove the Main P.C.B. from Bottom Chassis according to arrow shown.

## 10.12. Disassembly of SMPS Module and Voltage Selector P.C.B.

- Refer to “Disassembly of Top Cabinet”.
- Refer to “Disassembly of Rear Panel”.

- Step 1** Detach 13P Cable Wire at the connector (CON2) on SMPS Module.  
**Step 2** Remove 2 screws.  
**Step 3** Remove SMPS Module and Voltage Selector P.C.B..

**Caution:** During assembling, ensure that SMPS Module is seated properly through the located & fully guided.

## 10.13. Disassembly of CD Mechanism Unit

- Refer to “Disassembly of Top Cabinet”.
- Refer to “Disassembly of Front Panel Unit”.

**Step 1** Remove 8 screws.

**Step 2** Detach Voltage Selector P.C.B. from Rear Panel as arrow shown..

**Step 3** Detach 10P FFC at a connector (CN8251) on Main P.C.B..

**Step 4** Detach 24P FFC at a connector (FP8201) on Main P.C.B..

**Step 5** Remove 1 screw.

Voltage Selector P.C.B

**Step 6** Remove 1 screw.

**Step 7** Release 2 catches.

**Step 8** Lift up and remove the Inner Chassis Unit..

**Caution:** During assembling, ensure that Inner Chassis Unit is caught onto Rear Panel properly.

**Step 9** Remove 2 screws.

**Step 10** Remove CD Mechanism Unit.

## 10.14. Disassembly of CD Interface P.C.B.

- Refer to "Disassembly of Top Cabinet".
- Refer to "Disassembly of Front Panel Unit".
- Refer to "Disassembly of CD Mechanism Unit".

**Step 1** Remove 2 screws.

**Step 2** Desolder pins of the motor (M7301).

**Step 3** Desolder pins of the motor (M7302).

**Step 4** Remove CD Interface P.C.B..

# 11 Service Position

**Note:** For description of the disassembly procedures, see the Section 10.

## 11.1. Checking of Panel P.C.B. and LCD P.C.B.

**Step 1** Remove Top Cabinet.

**Step 2** Remove Front Panel Unit.

**Step 3** Remove the Panel P.C.B. and the LCD P.C.B..

**Step 4** Positioned the Panel P.C.B. and LCD P.C.B. on the insulated material as shown.

**Step 5** Attach 17P FFC at a connector (CN2000) on the Main P.C.B..

**Step 6** Panel P.C.B. and LCD P.C.B. can be checked at diagram shown.

**Step 5** Lift up the Main P.C.B. as arrow shown.

**Step 6** Attach 13P Cable at a connector (CON2) on the SMPS Module.

**Step 7** Attach 17P FFC at a connector (CN2000) on the Main P.C.B..

**Step 8** Attach 10P FFC at a connector (CN8251) on the main P.C.B..

**Step 9** Attach 24P FFC at a connector (FP8201) on the Main P.C.B..

**Step 10** Side B Main P.C.B. can be checked at diagram shown.

## 11.2. Checking and Repairing of Main P.C.B. (Side B)

**Step 1** Remove Top Cabinet.

**Step 2** Remove Rear Panel.

**Step 3** Remove Main P.C.B..

**Step 4** Remove 2 screws.

### 11.3. Checking and Repairing of Main P.C.B. (Side A)

**Step 1** Remove Top Cabinet.

**Step 2** Remove Front Panel Unit.

**Step 3** Remove Rear Panel.

**Step 4** Remove Main P.C.B..

**Step 5** Remove SMPS Module and Voltage Selector P.C.B..

**Step 6** Positioned the Main P.C.B., SMPS Module and the Voltage Selector P.C.B. on the insulated material.

**Step 7** Attach 13P Cable at a connector (CON2) on the SMPS Module.

**Step 8** Attach 10P FFC at a connector (CN8251) on the main P.C.B..

**Step 9** Attach 24P FFC at a connector (FP8201) on the Main P.C.B..

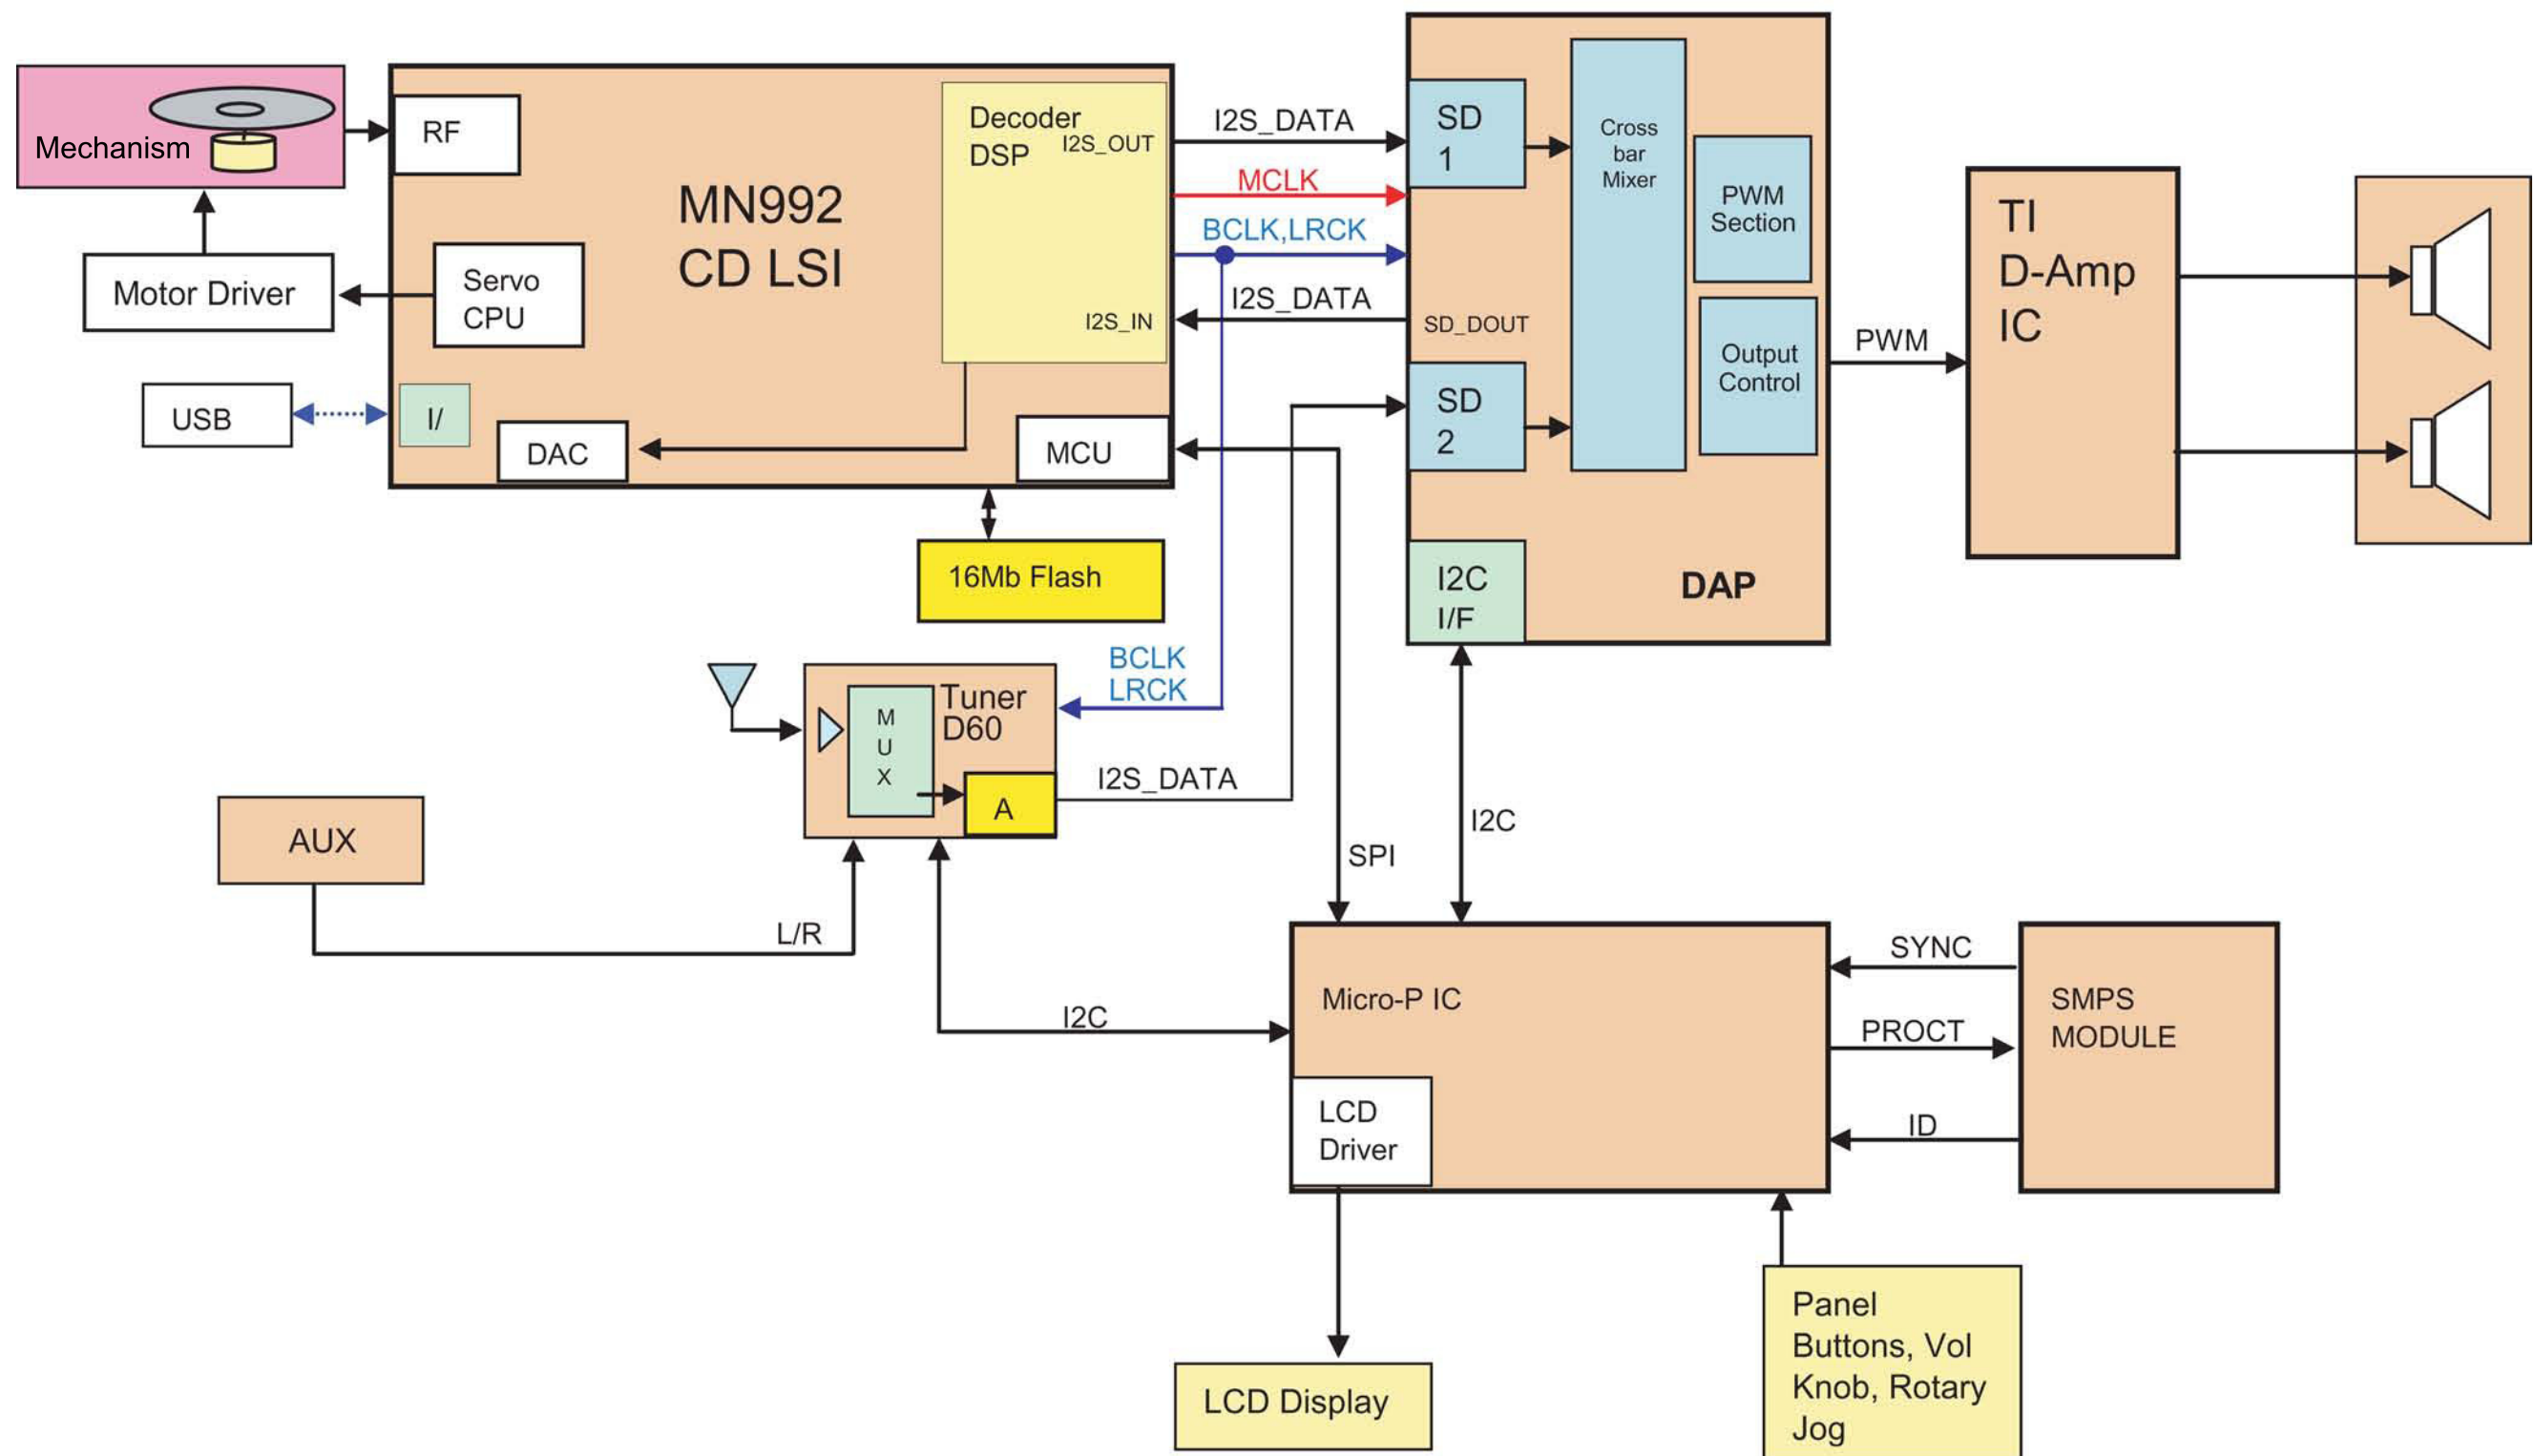

**Step 10** Attach 17P FFC at a connector (CN2000) on the Main P.C.B..

**Step 11** Side A Main P.C.B. can be checked at diagram shown.

- Important safety notice:

Components identified by ⚠ mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high quality sound (capacitors), low-noise (resistors), etc are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

### • Resistor

Unit of resistance is OHM [ $\Omega$ ] (K=1,000, M=1,000,000).

### • Capacitor

Unit of capacitance is  $\mu$ F, unless otherwise noted. F=Farads, pF=pico-Farad.

### • Coil

Unit of inductance is H, unless otherwise noted.

### • \*

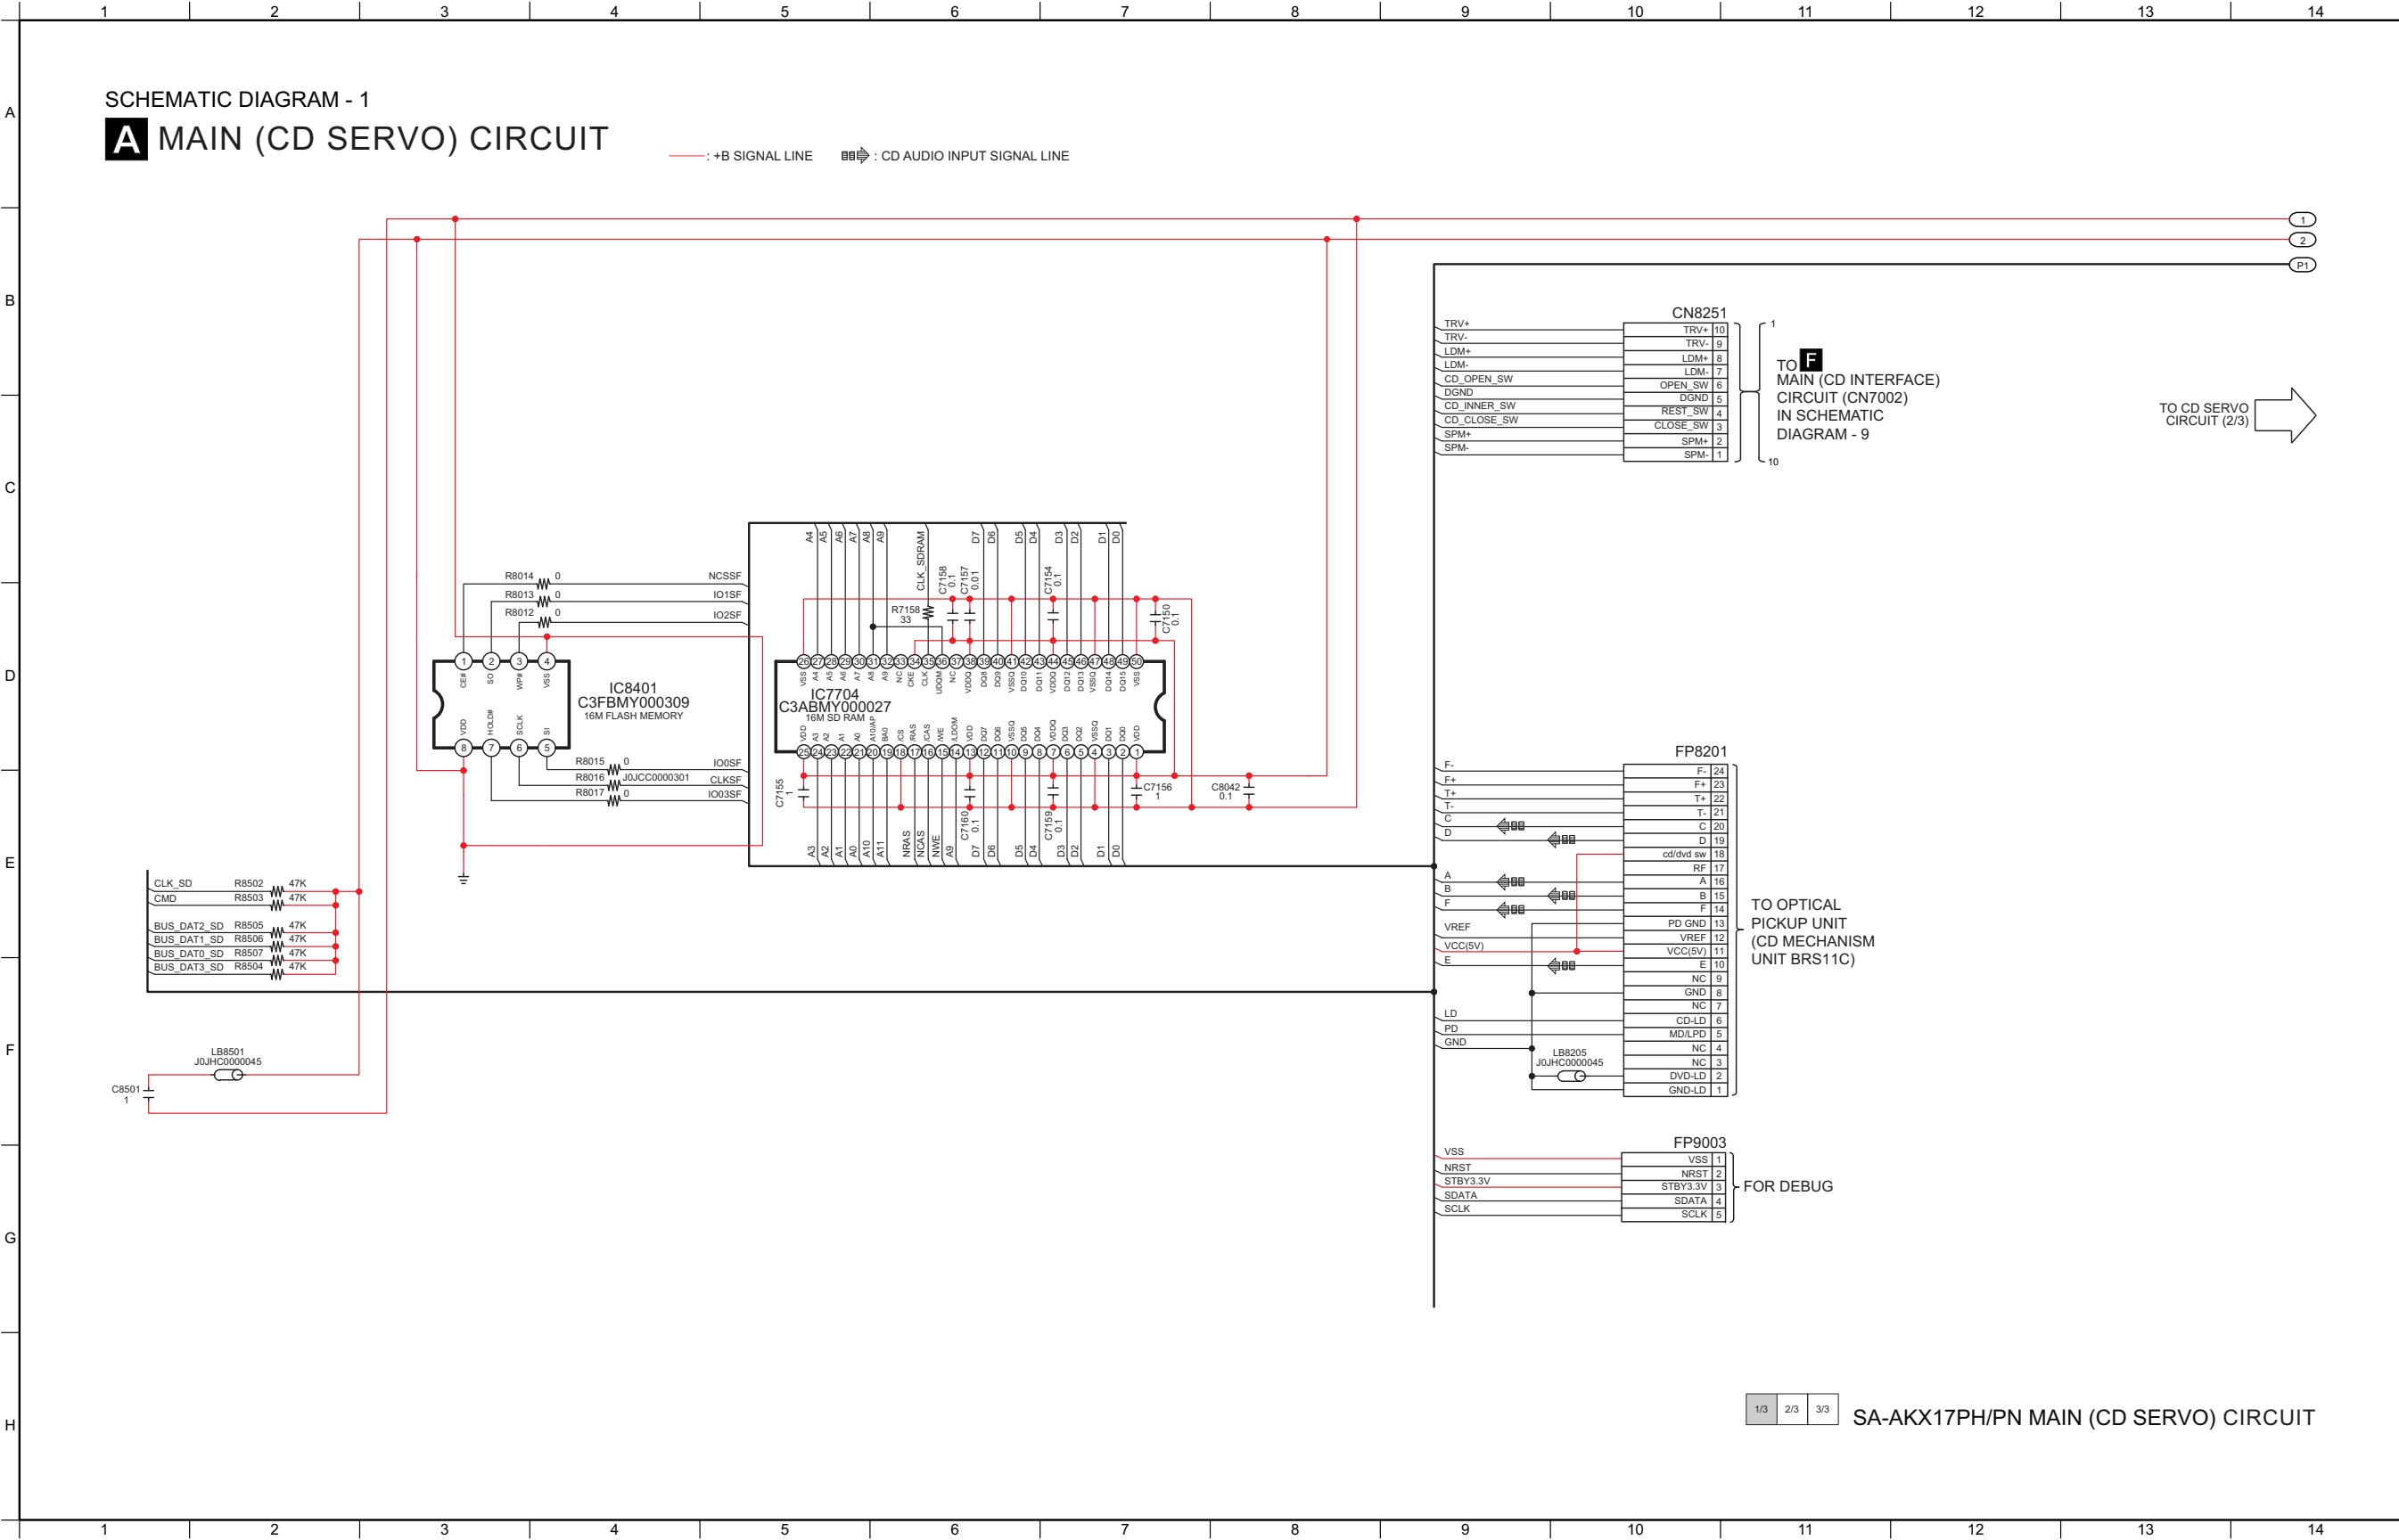

REF IS FOR INDICATION ONLY.

# 17 Appendix Information of Schematic Diagram

## 17.1. Voltage Chart

### Note:

- Indication Voltage Values are in standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard.

Therefore, there may exist some errors in voltage values, depending on the internal impedance of the DC circuit tester.

- Circuit voltage and waveform described herein shall be regarded as reference information when probing defect point because it may differ from actual measuring value due to difference of Measuring instrument and its measuring condition and product itself.

#### Important Safety Notice

Components identified by  mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

#### RTL (Retention Time Limited)

**Note:** The marking (RTL) indicates that the Retention Time is Limited for this item.

After the discontinuation of this assembly in production, the item will continue to be available for a specific period of time. The retention period of availability is dependant on the type of assembly, and in accordance with the laws governing part and product retention.

After the end of this period, the assembly will no longer be available.

**Note:**

- When replacing any of these components, be sure to use only manufacturer's specified parts shown in the replacement part list.
- The parenthesized indications on the Remarks column specify the destination & product color (Refer to the cover page for the information).
- Parts without these indications shall be used for all areas.
- This product uses a laser diode. Refer to "Precaution of Laser Diode".
- All parts mentioned are supplied by PAVCJM unless indicated likewise.
- Reference for O/I book languages are as follows:

## 18.2. Electrical Replacement Parts List

### Important Safety Notice

Components identified by  $\Delta$  mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

#### RTL (Retention Time Limited)

**Note:** The marking (RTL) indicates that the Retention Time is Limited for this item.

After the discontinuation of this assembly in production, the item will continue to be available for a specific period of time. The retention period of availability is dependant on the type of assembly, and in accordance with the laws governing part and product retention. After the end of this period, the assembly will no longer be available.

**Note:**

- When replacing any of these components, be sure to use only manufacturer's specified parts shown in the replacement part list.
- The parenthesized indications on the Remarks column specify the destination & product color (Refer to the cover page for the information).
- Parts without these indications shall be used for all areas.
- This product uses a laser diode. Refer to "Precaution of Laser Diode".
- Capacitor value are in microfarads (uF) unless specified otherwise, P=Pico-farads (pF), F=Farads.
- Resistance values are in ohms, unless specified otherwise, 1K=1000 (OHM).
- All parts mentioned are supplied by PAVCJM unless indicated likewise.
- Parts mentioned [SPG] in the Remarks column are supplied by JAPAN.

**E.S.D. standards for Electrostatically Sensitive Devices, refer to "PREVENTION OF ELECTROSTATIC DISCHARGE (ESD) TO ELECTROSTATIC SENSITIVE (ES) DEVICES" section.**
